AWARD-WINNING ALFALFA

Prairie Creek Seed provides varieties that perform—and discounts that do, too.

Our number-one priority is supplying you quality forage, and our alfalfa varieties prove that commitment.

At the World Dairy Expo, agronomic leader **Pillar** demonstrated outstanding Relative Forage Quality (RFQ) value in the haylage division of the World Forage Analysis Super Bowl, as well as high milk per ton.

Our new **Leading Edge** is the most pest- and disease-resistant alfalfa in the Prairie Creek Seed lineup. High in quality and palatability, quick to recover, and excellent in relaxed cutting schedules, **Leading Edge** is a strong companion for nearly all other alfalfa.

Find an alfalfa variety to meets *your* needs at prairiecreekseed.com/resources.

Take advantage of this limited-time promotion to build both healthy herds AND healthy profits.
