## AWARD-WINNING ALFALFA and CORN HYBRIDS

**Prairie Creek Seed provides varieties that perform—and discounts that do, too.**

Our number-one priority is supplying you quality forage and yield, and our varieties prove that commitment.

At the World Dairy Expo, agronomic leader **Pillar** alfalfa demonstrated outstanding Relative Forage Quality (RFQ) value in the haylage division of the World Forage Analysis Super Bowl, as well as high milk per ton. Our new **Leading Edge** is the most pest- and disease-resistant alfalfa in the Prairie Creek Seed lineup. High in quality and palatability, quick to recover, and excellent in relaxed cutting schedules, **Leading Edge** is a strong companion for nearly all other alfalfa.

In the development of our **conventional corn hybrids**, we keep producers in mind as we select for premium, high-yielding performance without all the costly traits. Our hybrids are carefully crafted, tested, and evaluated for superior agronomics, disease resistance, and dependable yields across many environments. Call us today for more information on varieties for early interseeding of cover crops.

**Find alfalfa and corn hybrids to meet *your* needs at [prairiecreekseed.com](http://prairiecreekseed.com), or give us a call today.**
